jminusminus

## Class Identity

- [java.lang.Object](#)
  - [jminusminus.Identity](#)

- All Implemented Interfaces:  
[Converter](#)

```
class Identity
extends Object
implements Converter
```

The identity conversion requires no run-time code.

`Identity()`

- **Method Detail**

- **codegen**

`public void codegen(CLEmitter output)`

**Description copied from interface: `Converter`**

Emit code necessary to convert (cast) a source type to a target type.

**Specified by:**  
`codegen` in interface `Converter`

**Parameters:**  
output - the code emitter (basically an abstraction for producing the class file).
