# Constant Field Values

## Contents

- `jminusminus.*`

## `jminusminus.*`

`jminusminus.jminusminus.CharReader`

Modifier and Type	Constant Field	Value
-------------------	----------------	-------

<code>public static final char</code>	<code>EOFCH</code>	<code>65535</code>
---------------------------------------	--------------------	--------------------

`jminusminus.CLConstants`

Modifier and Type	Constant Field	Value
-------------------	----------------	-------

<code>public static final int</code>	<code>AALOAD</code>	<code>50</code>
--------------------------------------	---------------------	-----------------

<code>public static final int</code>	<code>AASTORE</code>	<code>83</code>
--------------------------------------	----------------------	-----------------

<code>public static final int</code>	<code>ACC_ABSTRACT</code>	<code>1024</code>
--------------------------------------	---------------------------	-------------------

<code>public static final int</code>	<code>ACC_ANNOTATION</code>	<code>8192</code>
--------------------------------------	-----------------------------	-------------------

<code>public static final int</code>	<code>ACC_BRIDGE</code>	<code>64</code>
--------------------------------------	-------------------------	-----------------

<code>public static final int</code>	<code>ACC_ENUM</code>	<code>16384</code>
--------------------------------------	-----------------------	--------------------

<code>public static final int</code>	<code>ACC_FINAL</code>	<code>16</code>
--------------------------------------	------------------------	-----------------

<code>public static final int</code>	<code>ACC_INTERFACE</code>	<code>512</code>
--------------------------------------	----------------------------	------------------

<code>public static final int</code>	<code>ACC_NATIVE</code>	<code>256</code>
--------------------------------------	-------------------------	------------------

<code>public static final int</code>	<code>ACC_PRIVATE</code>	<code>2</code>
--------------------------------------	--------------------------	----------------

<code>public static final int</code>	<code>ACC_PROTECTED</code>	<code>4</code>
--------------------------------------	----------------------------	----------------

<code>public static final int</code>	<code>ACC_PUBLIC</code>	<code>1</code>
--------------------------------------	-------------------------	----------------
